

A. Leave-One-Subject-Out (LOOCV) Predictive Superiority

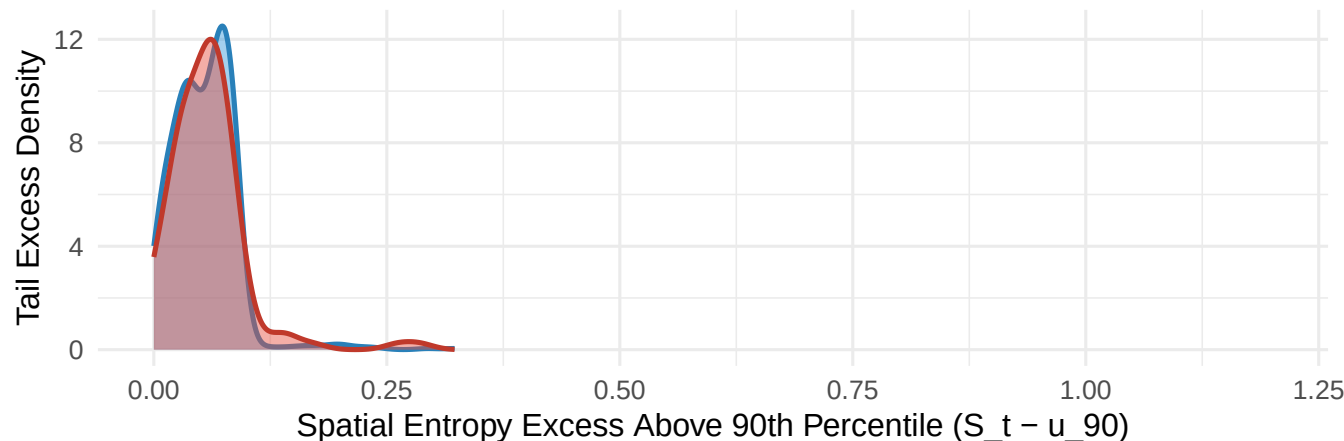

Distribution of Held-Out Log-Likelihood Advantage over WSLS (N=128 Subjects)

Symplectic Superiority: +7.9 Delta LL / Subject
(75.0% Subject Win Rate)

B. Emergence of Asymptotic Tail Broadening in Sparse Microcircuit

Generalized Pareto Tail of High-Dimensional Spatial Entropy S_t

Null Trials (sigma = 0.062) Pause Shock tau = +1 (sigma = 0.066, +6.3%)
